SUMMARY

A Front-End Developer Skilled in building dynamic, high-performance user interfaces using Vue.js. Proficient in creating reusable components, ensuring responsive and accessible designs, and collaborating with cross-functional teams to deliver engaging web applications.

Work Experience

Front-End Developer (full time)

Davinda June 2024 – January 2025.

- Work closely with the backend development team to integrate APIs and handle data bindings between the frontend and backend systems.
- Developed reusable components that can be used in future projects with minimal effort.
- Collaborate closely with the design team to translate wireframes and visual designs into interactive and responsive web interfaces using Vue.js.
- participated in the development of more than three websites with its dashboards that the company was working on using vue.js .

Web Design (full time)

Davinda November 2022– January 2025

- Translating design mockups into responsive, interactive websites using HTML, CSS, JavaScript, along with frameworks like Bootstrap for layout and design, and libraries such as jQuery for DOM manipulation.
- Ensuring that the websites functioned seamlessly across different browsers, adjusting CSS and JavaScript as necessary to maintain functionality and appearance.
- Crafting websites that provided an optimal viewing experience across a wide range of devices, from desktops to mobile phones, through the use of responsive design techniques.
- Handled data entry tasks for dashboard projects, including uploading and managing content as part of the design and testing process.

Applied College - Tishreen University

Web subject teacher Nov 2020 - Sept 2022

- Teaching basic web development involves a variety of responsibilities aimed at providing students with a solid foundation in web technologies, design principles, and best practices

- Preparing detailed lesson plans that provide a clear learning path from basic to more complex concepts.
- Supervising lab sessions where students get hands-on experience coding and debugging web pages and applications.
- Offering office hours for students to discuss course material, seek clarification on complex topics, or receive additional support on their projects.

Projects

Vms :

This project is a virtual school here in Damascus for middle and high school.

<https://vmssyria.com/>
